AMGAD KAMEL

Architect and interior designer Amgad Kamel of ak Interiors has been recognised as one of Australia's top 50 designers. He is highly skilled, applying his innovative ideas and wealth of experience to form stylish, comfortable and practical interior environments, including bespoke residential and commercial projects. His innovative approach and sense of style are highly sought after by discerning clients seeking unique and tailored design solutions.

"When I started working on this room I took into account the simple architectural design of the space and converted it into a glamorous living/dining space. I wanted it to reflect the interior style I like to live with — from my favourite black velvet sofas with Swarovski crystal buttons and pink legs to the artwork I've collected over the years. There is an oriental touch and classical elements; however, the room breathes contemporary living. This is my office away from the office; I use this room to read and sketch my thoughts for new projects. I simply love it, as it speaks my style, makes me feel comfortable and makes me challenge my creativity."
